SUMMARY

Software Developer (Fresher) with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and core Computer Science fundamentals. Hands-on experience across the full **Software Development Life Cycle (SDLC)** – designing, developing, testing, and deploying scalable, real-time web applications using the **MERN stack** (MongoDB, Express.js, React.js, Node.js). Proficient in **RESTful API design and development**, **JWT-based authentication & authorization**, relational and NoSQL **database design**, and **version control (Git/GitHub)**. Strong analytical and problem-solving skills, with 230+ LeetCode problems solved, seeking a Software Developer role to build efficient, maintainable, production-grade software.

EDUCATION

CMR Institute of Technology

Master of Computer Applications (MCA) – CGPA: 8.22

2025 – 2027 (Pursuing)

Bengaluru, India

Don Bosco College

Bachelor of Computer Applications (BCA) – CGPA: 7.08

2022 – 2025

Panjim, Goa

TECHNICAL SKILLS

Programming Languages: Java, C++, JavaScript (ES6+), Python, SQL

Web / Software Development: React.js, Redux, Node.js, Express.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design

API & Backend Development: RESTful APIs, JWT Authentication & Authorization, Microservices Basics

Databases: MongoDB, MySQL, Oracle, Redis, Database Design

Tools & Platforms: Git, GitHub, VS Code, Eclipse, npm, Postman

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs), Software Development Life Cycle (SDLC), Agile Methodology, Problem Solving

Operating Systems: MacOS, Windows

PROJECTS

Intelligent Health Disease Predictor | *React.js, Node.js, Express.js, MongoDB, JWT, ML*

- Engineered a full-stack, **ML-integrated health prediction system** analyzing user symptoms, medical reports, and skin images to identify possible diseases, achieving **92% prediction accuracy**.
- Designed and **developed RESTful APIs** to connect a **React.js** front end with a **Node.js/Express.js** backend, delivering real-time prediction results and healthcare recommendations.
- Implemented secure **JWT-based authentication** and prediction-history tracking, ensuring safe, role-based access to user data.

CodeForge – Online Coding Platform | *MERN Stack, MongoDB, Redis, JWT*

- Built a full-stack **software application** with an **in-browser code editor** supporting **multi-language code execution** and automated grading of coding challenges.
- Architected secure authentication, problem-submission pipelines, leaderboards, and coding-streak tracking using **JWT, MongoDB, and Redis** for low-latency data access.
- Developed an interactive learning hub and practice environment to help users strengthen **DSA and problem-solving** skills, improving user engagement.

TECHNICAL ACHIEVEMENTS

- Designed, built, and published **create-mern-pro**, an open-source npm CLI package that automates **MERN stack** project scaffolding, cutting developer setup time and averaging **200+ weekly downloads**.
- Built a **Node.js-based CLI automation tool** to eliminate repetitive boilerplate code and standardize project structure across new builds.
- Solved **230+ Data Structures & Algorithms problems** on LeetCode, strengthening core problem-solving and coding-interview readiness.

CERTIFICATIONS & HACKATHONS

- Certifications:** Operating Systems – Scaler; SQL (Intermediate) – HackerRank; JavaScript Algorithms and Data Structures – freeCodeCamp.
- Hackathons:** Stackathon 2025 – Full Stack Development Hackathon, CMRIT; “How Gen AI Can Help Indian Police” Hackathon 2025; Sustain-A-Thon 2026 – Data-Driven Sustainability Hackathon, CMRIT.
